Consumers deserve to make their own choice in quality shellfish products.

Proposed rules being reviewed by FDA that would require shellfish to be processed eliminate consumer choice and ensure higher consumer prices at restaurants and retail outlets.

I /we support consumer education and strongly oppose these unnecessary, restrictive and costly rules.

X Please reject this threat which would deny consumers their right to choose the form of the product they wish to eat and which would forever change the structure of the shellfish industry by denying this petition.

REJECT
Docket No. 98P-0504
